

DEKO FV Glass

A 99.9% Glazed Folding Partition

Simple Space Planning

Solid DEKO FV Folding Partitions are the obvious choice for some places in a building – and in other places DEKO FV Glass fully glazed folding partitions with their transparent look are the preferred method of dividing up large rooms into smaller units.

The fully glazed folding partition can be built into existing solid walls or combined with our fixed DEKO FG fully glazed partitions to achieve a complete interior formed with single glazed partitions.

Folding partition with small visible trims

DEKO FV Glass partitions are built to suit the specific opening into which they are to be installed. As standard folding partitions are supplied with small exclusive trims in the corners of glazed elements with a top track fitted in the ceiling structure and a guide rail on the floor.

The system is supplied with natural anodised aluminium trims and glazed elements of 10 mm toughened clear safety glass in individual module widths of up to 1000 mm.

The trims can also be powder coated in other colours - and the folding partitions can be supplied with different types of glass.

Decoration

Like our other DEKO glazed partitions, DEKO FV Glass is suitable for applied film in such designs as stripes, patterns or texts in various colours or frosted versions.

One or more glazed elements in the folding partitions can be supplied with coloured or frosted glass for both privacy and options to use the surfaces as whiteboards.

For additional privacy, Venetian blinds or drapes can be fitted.

Suspension, locking and stacking

DEKO FV Glass is a top-hung system with continuous aluminium tracks fitted to structure with guide rails on the floor. The bottom trims on the glazed elements also function as locks to the guide rail.

If the folding partition is installed with an odd number of glazed elements, the last element always functions as a door. Options for door handles include a recessed handle, a knob, a bracket handle or a ball catch.

Installed with an even number of elements, the entire fully glazed folding partition can be supplemented with a DEKO FG pivot operated fully glazed door.

If locking of the door is required, the last element of the folding partition or door can be equipped with a corner lock at the floor.

DEKO FV Glass is easy to operate due to the connected glazed elements.

Fully glazed folding partitions are supplied both as single and double leafed partitions and side-hung for eccentric stacking.

DEKO FV Glass is also available with centre stacking arrangement – even with high height requirements.
